

Issue	<p>Hudbay Minerals, Inc., a Canadian mining company, has proposed a new open-pit copper and molybdenum mine on 5,000 acres southeast of Tucson, Arizona, including 3,655 acres of National Forest land. After reviewing the U.S. Forest Service's (USFS) Environmental Impact Statement (EIS), Region 9 rated it "Environmentally Unsatisfactory," and determined that USFS' proposed approval of the mine plan of operations may warrant referral to the Council on Environmental Quality (CEQ). In July 2016, the US Army Corps of Engineers (USACE) Los Angeles District recommended denial of Hudbay's application for a Clean Water Act §404 permit.</p>
Background	<p>According to the EIS, as well as studies produced by the proponent, the proposed mine could produce up to 10% of the U.S. annual production of copper, generate 400 jobs over 24-30 years, and would:</p> <ul style="list-style-type: none">• Permanently fill 18 linear stream miles, significantly degrading regionally rare, largely intact mosaics of some of the highest quality stream and wetland ecosystems in Arizona;• Pollute state-designated "Outstanding National Resource Waters" with heavy metals;• Cause regional groundwater draw-down adversely affecting about 800 water supply wells and 40,000-60,000 acres of habitat, including federally protected conservation lands;• Destroy an area sacred to the Tohono O'odham Nation, disturbing over 100 prehistoric and historic cultural sites, of which over 1/3 are known to contain human burials;• Degrade regional visibility and cause airborne deposition of nitrogen in Saguaro National Park and other Class 1 areas;• Adversely affect 12 federally listed threatened or endangered species; and• Cause economic losses in tourism exceeding total mine payroll. <p>Timeline:</p> <ul style="list-style-type: none">• February 2012: EPA rated the USFS' draft EIS as <i>Environmentally Unsatisfactory – Inadequate</i> (EU-3), and identified the §404 permit as a candidate for USACE HQ review. <div><h2>Deliberative Process / Ex. 5</h2></div>
Stakeholders	<p>Mine Supporters: Arizona Governor Doug Ducey, Chamber of Commerce Mine Opponents: Tohono O'odham Nation; Pima County; other local agencies; tribal governments; NGOs; local farmers and community members; Congressman Raul Grijalva</p>
Next Steps	<ul style="list-style-type: none">• USACE SPD: Decide to uphold or overturn District's §404 recommended permit denial. <div><h2>Deliberative Process / Ex. 5</h2></div>
